

# HAPPY HOME HOLDS RECYCLED CRAFT CONTEST

**HT Correspondent**

Children gave free rein to their imagination and creativity at the Inter-School Recycled Craft Competition at Happy Home Public School, Rohini.

The creative hands of children from Classes 3 to 10 produced master pieces with waste but well selected, decorative and meaningful material in the event organised by Fevicol. The precision of colour combinations, the unique crafting ideas, the variety of objects, the lovable handling and the discipline and interest maintained by the students during preparation, caught everyone's attention and won appreciation. To treasure the memorable creations and student's exuberance, an exhibition of such decorative items was arranged which ignited all the artistic minds with an urge to learn the art of using waste material in the best possible way.

School principal and teachers lauded the efforts of children for their recycled craft idea. All the school level winners look forward to the city level finale.
